HISTORY

ALVIC Sport Ltd. was created by two friends.

One of them is **Victor Nagy**, waterpolo world champion, 8x Hungarian champion, the Champions League champion.

Viktor always thought about the end of his waterpolo career and the steps should be done before that, to be prepared for a civil life. For this reason, he invited Alexander Belij, who had already a significant experience in the sports ball market, to be his business partner.

The name of brand is not accidental either! It was created from the names of two partners: **ALex + VICtor = ALVIC.**
